

Project Name: Coffee Beans Company – Production Monitoring Dashboard

Overview: This project focuses on developing a **Production Monitoring Dashboard** for the Coffee Beans Company. The dashboard provides real-time insights into production rates, sales targets, inventory levels, and operational efficiency across multiple locations.

Details:

Production Monitoring Dashboard:

- **Objective:** Track and monitor production rates across various locations (California, Florida, Illinois, New York, Texas) and analyze the sales rate in comparison to the target. It also provides insights into inventory levels for different coffee products (Geisha, Arabica, Bourbon, Robusta, Catimor).
- **Tools Used:** Microsoft Excel for data visualization and reporting.
- **Key Features:**
 - **Month-to-month comparison** of production quantities.
 - **Daily production rate** tracking by location.
 - Real-time **sales rate vs target** gauge.
 - Monitoring **OPEX metrics** and sales averages.
 - **Inventory tracking** for various coffee bean types.
